**Research:**

- Must have research experience in anatomy and anatomical sciences, including application of computational tools and methodologies
- Working knowledge of computer programming, structural modeling, machine learning, and artificial intelligence (AI), etc.
- Strong candidates will endorse and embrace cross-disciplinary team science approaches to computational anatomy

**Teaching:**

- Teaching of gross anatomy to professional and graduate students is a requirement for this position
- Candidates will be expected to help in the design and implementation of a new computational anatomy course that focuses on the fusion of cadaveric and virtual models and leverages these approaches to support the education of graduate and professional students
