Job Description

Assistant Professor/Associate Professor of Epidemiology

Description:

The Department of Epidemiology of Columbia University Mailman School of Public Health is recruiting multiple faculty members at the levels of Assistant or Associate Professor. The Department has nearly a century of history and a dynamic faculty with core strengths in chronic disease epidemiology, environmental epidemiology, infectious disease epidemiology, psychiatric epidemiology, neuro-epidemiology, social epidemiology, substance abuse epidemiology, violence and injury epidemiology, global health, urban health, causal inference, epidemiologic methods, and other public health and biomedical areas. A new chair and faculty have recently bolstered the department's vision and

opportunity for growth.

Positions are tenured, tenure track, or non-tenure track, commensurate with career stage and level of achievement. We are seeking to further strengthen our capabilities and impact in the core strengths listed above and are also open to applicants whose interests go beyond these areas. We are particularly interested in highly motivated investigators with the methodologic and interpersonal skills to lead and sustain diverse scientific teams and produce new interdisciplinary connections, knowledge, and impact beyond those within the department, the school, and Columbia University. Candidates with experience conducting community and clinical intervention trials as well as implementation science are encouraged to apply. Diversity and inclusion are an overt part of the Department of Epidemiology and are key components in all our hiring decisions. Enthusiasm for teaching and mentoring a new generation of scientists and practitioners of epidemiology will also be seen as highly advantageous for prospective candidates.

Minimum Qualifications:

Doctoral degree in epidemiology or related field (PhD, ScD, DrPH, MD, or equivalent) with postdoctoral training or experience required. Strong publication record and demonstrated excellence in teaching and mentoring are required. An established record, or clear future promise, of leading extramurally funded projects is essential, as is a demonstrated enthusiasm for the impact that their research, teaching, and service can and should have on the public's health.

EEO/AA Policy

Columbia University is an affirmative action/equal opportunity employer.
