Job Description

Lecturer - Medical Studies, College of Health Solutions

The College of Health Solutions at the Arizona State University, Downtown Campus, is seeking three full-time, 9-month, non-tenure eligible faculty members at the rank of Lecturer to teach undergraduate courses in the Medical Studies bachelor's degree program. Faculty duties include teaching courses within the Medical Studies curriculum (80%, equivalent to 12 credits per semester) and service to the college (20%). The faculty member will be required to teach online courses and on-ground courses on the ASU Downtown Campus and/or the ASU West campus. Applicants must present evidence of teaching experience and a strong commitment to high quality teaching at the undergraduate level. This is a fixed-term appointment that is renewable annually. Subsequent one-year appointments may be offered, under the same terms and conditions, at the discretion of the college and university. Salary is dependent on qualifications.

The College of Health Solutions (CHS) is dedicated to translating scientific advances into practical interventions to improve health outcomes through education, research and service. We equip students with the knowledge and skills to influence healthier lifestyle choices; develop creative interventions to improve the health of people and populations; analyze and translate large amounts of health data into solutions; and maximize the technology, science, business and application of diagnostics. CHS research programs encompass basic/discovery science, clinical trials, intervention science and measurement of health outcomes. In all cases, CHS faculty use interdisciplinary approaches to address the complex systems that underpin health problems. The college is highly collaborative, transparent and team-oriented with an innovative organizational structure that includes translational teams, affinity networks, and academic programs to improve the health of people and communities.

The current training programs include behavioral health, biomedical diagnostics, biomedical informatics, executive and continuing education, exercise science, health promotion, health sciences, kinesiology, medical studies, nutrition, population health, the science of health care delivery, and speech and hearing science. Our programs are offered at ASU's Downtown Phoenix, Tempe, West and Lake Havasu campuses, as well as on Mayo Clinic's Scottsdale campus.

For more information about ASU and the College of Health Solutions, visit <http://about.asu.edu/> and <https://chs.asu.edu>

Required Qualifications

? Master's degree or higher in health science or related fields

? Demonstrated ability to teach undergraduate courses in the specified areas of Health Sciences
