services, organizational science, etc.); (2) evidence of collaborative research supporting advances in population health, community health, mental health, health promotion, disease prevention, cancer and chronic disease prevention and control, and/or health services research; 3) track record of established independent research funding including NIH-funded grants (e.g., K-series and/or R-series); (4) commitment to excellence in teaching and advising graduate students; and (5) excellence in written and oral communication skills. Multi-disciplinary training, with backgrounds that include computer sciences, statistics, law, engineering, and other equivalent disciplines/fields will also be considered.

Responsibilities will include research, teaching, and community service. The applicant will develop and implement research related to population health, community health and/or clinical health initiatives and work collaboratively with UTHealth School of Public Health colleagues. The applicant must demonstrate practical/applied expertise in analytic methods appropriate to enhancing research investigating psychosocial, behavioral, structural, and/or environmental factors associated with health outcomes as well as empirical research involving the design, implementation, and evaluation of health promotion interventions.

We encourage applicants with a broad array of skills and experience related to Social/Behavioral Science, Health Promotion, Health Management and Policy, and Community Health to apply. We are particularly interested in applicants with expertise in violence, mental illness and substance use disorders, and/or military health. We also encourage experience with systems science for population health (e.g., machine learning, agent-based modeling, social network analysis, systems dynamics modeling, etc.), dissemination & implementation research, participatory-based research methods, quantitative methodologies and analytic approaches to population research, innovative modelling techniques or the application of innovative alternative study designs appropriate for complex clinical and/or community-based studies. We will be hiring one faculty at the tenure-track associate professor or full professor level.

The applicant must demonstrate experience as an independent researcher with funded research studies, presentations at national and international conferences, and a record of high-quality peer-reviewed publications. The successful candidate will provide guidance and mentorship to graduate and post-doctoral students. The candidate will participate in classroom instruction and should be prepared to teach graduate level classes. Teaching commitment will be agreed upon with Department Chairs and the Curriculum Coordinator in the Department. We aim to recruit outstanding research scholars, and the compensation package will be competitive.

UTHealth School of Public Health, an integral part of UTHealth, is located within the Texas Medical Center (www.texmedctr.tmc.edu) and has 165 faculty and 1300 students at six campuses located strategically throughout Texas. Opportunities for research and collaboration are outstanding. San
