**Job Description**

The School of Pharmacy at the University at Buffalo is seeking a **Research Nurse**, who will be a part of the **Transplantation Immunosuppressive Pharmacology Research Program (TIPRP)**. The TIPRP at the University at Buffalo (UB) is a multidisciplinary research program in clinical pharmacology research in the areas of chronic kidney disease and renal transplantation. The TIPRP emphasizes pharmacokinetics, pharmacodynamics and pharmacogenomics of immunosuppressive medicines for over 20 years. This program is a component of the Translational Pharmacology Research Core (TPRC) laboratory facility. The TIPRP is located in the School of Pharmacy and Pharmaceutical Sciences on South Campus at UB and the Nephrology Division at the Erie County Medical Center. This research program has contributed many publications that report on the influence of gender and race on immunosuppressive medicines after kidney transplant.

The **Research Nurse** position is seeking a Registered Nurse(RN) and includes the following responsibilities:

- Complete Patient Screening - Case Report Forms in renal transplant recipients with understanding of the disease processes and drug therapy in adequate detail and in a timely fashion to facilitate patient enrollment, if applicable
- Ability to use nursing skills to effectively evaluate, and respond to enrolled patient's clinical responses over the course of the 12-hour pharmacokinetic and pharmacodynamic (PK/PD) study period and provide/obtain appropriate medical intervention and maintain documentation.
- Ability to use medical/nursing knowledge during screening process to accurately interpret medical data and communicate interpretation in a professional and timely manner.
- Competence with placement of intravenous angiocatheters using safe and aseptic techniques in patients with chronic kidney diseases and kidney transplants to enable and maintain adequate blood collection for 12 hour pharmacokinetic and pharmacodynamic studies.
- Ability to administer and complete the study consent process after completion of required training through Collaborative Institutional Training Initiative (CITI Program) for Biomedical Research and HIPAA and other required training mandated by the Institutional Review Board at University at Buffalo.
- Ability to accurately and safely collect biologic specimen such as blood, urine and sputum) using safe and proper aseptic and blood collection techniques for patient and nurse while recording accurate timed collections for research study. with careful maintenance of IV angiocatheter.
- Ability to collect and process biologic samples in a timely fashion according to specified protocol in order to be compliant with timed pharmacokinetic sample collections using proper aseptic technique and current biohazard standards for handling biologic samples.
- Ability to accurately collect and maintain nursing documentation over the course of a 12 hour pharmacokinetic and pharmacodynamic study period which includes documentation of patients' vital signs, patient responses, and administration of chronic medications in relation to study protocol.
- Ability to accurately collect and enter clinical data into web based data collection forms from patients' clinical information from the study period.
- Provide monthly updated summaries regarding screening, patient enrollment relative to targets and patient outcomes over the 12-hour pharmacokinetic-pharmacodynamic study period.
- Documentation of adverse events that may occur during the study visits and provide summaries for documentation and submission to the UB Health Sciences IRB as these events occur.
- Provide general nursing skills as needed by the study patients over the enrollment and 12-hour study period.
- Provide very good communication skills with patients and research staff regarding day-to-day operations and challenges concerning study issues and patient care.
