***For full consideration, please apply by March 19, 2025.***

This is a rare opportunity to build, shape and lead, working closely with executive leadership at Roosevelt University (RU), a proud Hispanic-Serving Institution, nationally recognized for its dedication to advancing STEM education. As a senior-level tenure-track or tenured faculty, the Director of Biomedical Sciences will design and lead the launch of innovative graduate programs, including an M.S. and Ph.D. in Integrated Biomedical Sciences, positioning RU as a leader in fostering interdisciplinary biomedical education. With a student body that includes 42% first generation, RU is ranked among the Top 20 Best Colleges for Women in STEM. This position offers the chance to leave a lasting impact leading an initiative at the cornerstone of the university's strategic growth and its vision for building programs that empower students and advance the field of biomedical sciences.

The successful candidate will be an integral part of RU's growth and innovation under its "Producing Research and Innovation through a Mentoring Ecosystem" (RU PRIME) initiative as funded by the U.S. Department of Education under a highly selective, multi-year grant award. RU PRIME reflects the university's commitment to invest in a set of self-sustained and integrated graduate degree programs supporting STEM students from entry into RU through graduation. This role requires a dynamic leader who can foster a student-centered environment while ensuring that the RU PRIME initiative's goals are met and sustained.

The Director will establish a faculty research cluster focused on biomedical sciences and lead two program development areas. In collaboration with RU faculty and leadership, they will design, earn accreditation for, and implement two graduate degree programs (an MS degree initially, with a Ph.D. program to follow). Additionally, they will contribute to developing a vertically integrated research ecosystem supporting STEM students.

This position reports to the Chair of the Department and is a 12 month, full-time exempt faculty position with occasional evening and weekend work required. The primary location for this position will be at the Schaumburg campus. Due to the nature of the funding for this position, sponsorship will not be possible.

This is an on-campus role. However, the College offers a flexible schedule during the summer months.

### **DUTIES AND RESPONSIBILITIES**

#### **Program Development and Leadership (50%):**

- Build the Integrated Biomedical research cluster, including recruiting and hiring new faculty, and

- providing mentorship to support faculty success in teaching, research, and service
- Engage market and trends data to create, and guide through internal governance and accreditation, new biomedical degree programs, e.g., M.S. and Ph.D. Integrated Biomedical Sciences
- Create and manage course schedules to be student-centric in flexibility and convenience
- Deploy universal design, Quality Matters (or similar), and experiential learning solutions to continually improve curricula
- Teach a reduced course load of core and/or elective courses in biomedical sciences each year

### **Research and Faculty Mentorship (25%):**

- Continue an active agenda of research that will broaden the discipline and reflect the future of the field
- Continue to seek and acquire external funding
- Guide and mentor junior faculty in the development of active, grant-funded research agendas
- Direct student research towards advanced degrees

### **Program Administration (25%):**

- Serve as part of the Schaumburg Campus leadership team by being an active participant in campus events as well as in the broader academic, business, and governmental communities
- Lead recruitment, hiring and development of college faculty (full-time and adjunct) and staff
- Promote excellence in recruiting and retaining faculty and staff
- Build, mentor, and empower a faculty body of full-time and adjunct instructors
- Collaborate with Roosevelt University's Student Success and Student Affairs teams toward continually improving support, retention, graduation rate, and professional prospects for RU students
- Collaborate with Enrollment and Marketing team toward growing both domestic and international student bodies for the specified degree programs
- Manage program budget, monitoring and assuring alignment of expenditures with college and university strategic plan, as well as fiscal responsibility and accountability
- Work with admissions staff in marketing and recruitment of students
- Meet with admissions staff as needed to explain programs and career opportunities related to those programs

### **KNOWLEDGE, SKILLS AND ABILITIES**

- Demonstrate experience in program development, faculty mentoring, and academic leadership at

- a senior level
- Excellent communication skills and outstanding teaching experience
- Comprehensive knowledge and history of leadership in an area of biomedical sciences
- A strong publication history supported by external funding, reflecting a high level of research productivity and impact
- Demonstrated record of creating a climate of support and respect for all students and colleagues
- Reflect the innovation and entrepreneurship incumbent to STEM fields that can evolve current degree programs and update current programs
- Understand how a backward mapped pedagogical approach creates a positive learning experience
- Experience with the design and implementation of curriculum and assessment, through relevant college service, or as course instructor

### MINIMUM QUALIFICATIONS

- Ph.D. in Biomedical Sciences or related field
- At least five (5) years' experience in academia, including at least three (3) years in academic leadership role(s), such as director, department chair, department head or other relevant academic leadership
- Eligible for appointment at rank of associate or full professor based on a strong record of effective instruction and high-quality scholarship

### PREFERRED QUALIFICATIONS

- Experience serving students and understanding and fulfilling their sometimes unique academic and complementary needs and aims
- Prior service and mentorship of doctoral candidates' research
- Earned accreditation from the Higher Learning Commission, or another regional accreditor, for new graduate degree programs.
- Demonstrated excitement and intrigue for the innovative fields within biomedicine and be eager to dream, create, and develop best practices focused on students' academic endeavors

### About the Institution

Roosevelt University is a private university located in the heart of Chicago, Illinois, known for its commitment to academic excellence and social justice. Founded in 1945, Roosevelt was established to provide access to quality education for students of all backgrounds. The university's mission continues to emphasize community engagement and academic innovation, making it a standout institution in the

Midwest. With a student body that represents over 40 countries, Roosevelt offers a truly global campus environment.

Roosevelt University has two campuses: the main campus in downtown Chicago and a suburban campus in Schaumburg, Illinois. The Chicago campus is located in the bustling Loop, offering students access to cultural, professional, and networking opportunities, while the Schaumburg campus provides a more traditional suburban setting with modern facilities and a focus on community engagement

The university features more than 70 undergraduate and graduate programs across fields like business, education, arts and sciences, and performing arts. From cutting-edge facilities like the LEED-certified Wabash Building to a plethora of cultural and professional opportunities, Roosevelt University equips its students with the skills and experiences needed to thrive in their careers and contribute meaningfully to society.

### **Living in the Area**

Living in the Chicago metro area offers a unique combination of vibrant urban living, cultural richness, and professional opportunities. As the third-largest metropolitan area in the United States, Chicago boasts a dynamic mix of neighborhoods, each with its own character and charm. Residents have access to world-class museums, theaters, and music venues, as well as iconic landmarks like Millennium Park, the Chicago Riverwalk, and Navy Pier. The city's thriving food scene ranges from deep-dish pizza to Michelin-starred restaurants, reflecting its multicultural heritage.

Living in Schaumburg offers a quieter, suburban alternative to Chicago while still providing access to excellent amenities and a strong sense of community. Known for its spacious homes, excellent schools, and expansive parks, Schaumburg is ideal for families and those seeking a slower pace of life. The suburb boasts the Woodfield Mall, one of the largest shopping destinations in the country, and is home to a variety of restaurants and entertainment options. Its proximity to major highways and public transit makes commuting to Chicago convenient, though Schaumburg itself offers plenty to keep residents engaged. It's a great mix of suburban comfort and metropolitan accessibility.

The Chicago metro area is also a hub for career opportunities, with industries such as finance, healthcare, technology, education, and the arts thriving in the region. Its robust public transportation system, including the "L" trains and Metra commuter rail, makes it easy to navigate both the city and the suburbs. Additionally, the area's housing options, ranging from downtown high-rises to quiet suburban homes, offer something for everyone. With its vibrant energy, professional prospects, and endless entertainment, the Chicago metro area is an exciting and fulfilling place to live.
