Posting Detail Information

Position Summary

The UB [Division of Behavioral Medicine \(Department of Medicine\)](#), seeks a full-time **Research Support Specialist**. The successful candidate will be part of a research team investigating pediatric and young adult pain and substance use in individuals with chronic medical illness.

Brief description of Duties. Responsibilities include but are not limited to:

- Adhere to research protocols and complete daily research-related tasks to run the lab efficiently.
- Contact and schedule participant appointments; conduct participant screenings; administer measures and enter data in software program (s).
- Enter data collected via online survey platforms and assist in completing research compliance reports.
- Interface with research and clinical staff, including physicians, nurses, psychologists, etc to maintain effective communication for all study activities.
- Conduct literature reviews and documents to support manuscript preparation, oral presentations, poster presentations, and grant writing.
- Assist in creating recruitment materials
- Train interns and undergraduate students as required.

The successful candidate will be provided training in clinical assessment and behavioral treatment methodology and will gain experience in general research administration and the preparation of grants and manuscripts. Additional independent research opportunities, including conference and manuscript submissions, will be available based on interest, experience, and suitability. This position is well-suited for individuals interested in pursuing graduate study in medical or clinical psychology programs.

identity, national origin and veteran or disability status

Minimum Qualifications

- Bachelors degree in psychology, child development, pre-medical studies (or related field) and one year of related experience or an equivalent combination of education and experience.
- Excellent oral and written communication skills; demonstrated attention to detail; ability to work harmoniously with diverse groups of individuals

Preferred Qualifications

- Bachelors degree or higher plus one year of related experience, or an equivalent combination of education and experience.
- Research, professional experience, and/or interest with pain, substance use, pediatric, or oncology research is preferred.
- Proficiency with Microsoft Word, Excel, and PowerPoint, and willingness to learn data management software programs.
- Strong attention to detail, ability to function autonomously in a collaborative multidisciplinary team involving medical, research and behavioral medicine care, and willingness to learn and develop additional computer skills related to data management and preparation of data for analysis.
- Hybrid schedule is available; however, a car is necessary to reach multiple work locations

Physical Demands

Salary Range

\$32,000
