Job Description

The Frank Reidy Research Center for Bioelectronics at Old Dominion University (<https://ww1.odu.edu/bioelectronics>) invites applicants for **Research Faculty at a rank of Research Assistant, Research Associate, or Research Professor. This is a 10-month non-tenure track appointment supported by state funds.** The successful candidate will perform cutting-edge experimental biomedical research in a broader area of bioelectronics (which encompasses bioeffects and applications of electric fields, electrostimulation, electroporation, and roles of endogenous electric fields), report results at scientific forums, publish in peer-reviewed journals, compete for extramural grant funding, and actively collaborate with colleagues at Frank Reidy Research Center for Bioelectronics (FRRCBE) and beyond.

FRRCBE pioneers basic and applied research in the interaction of electric fields and ionized gases with biological systems. Its mission spans advancing scientific knowledge in biotechnology, medical diagnostics, therapeutics, and environmental applications. The Center emphasizes cutting-edge

**Research Faculty in Bioelectronics (Open Rank, 2 Positions,
Non-Tenure Eligible)
